

MULTIPLE SIGHTING

PROJECT 10073 RECORD CARD

1. DATE 16 Oct 60	2. LOCATION Montana, South Dakota, Canada	12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon <input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft <input type="checkbox"/> Was Astronomical <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical <input type="checkbox"/> Other _____ <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
3. DATE-TIME GROUP Local _____ GMT 17/0110-0115Z	4. TYPE OF OBSERVATION <input type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar	
5. PHOTOS <input type="checkbox"/> Yes <input type="checkbox"/> No	6. SOURCE Civilian	
7. LENGTH OF OBSERVATION 5 min	8. NUMBER OF OBJECTS one	9. COURSE NE
10. BRIEF SUMMARY OF SIGHTING Round cone, size of a basketball, blue, red, white, green and orange. Had fingers at the pointed end, brighter than a star and moving overhead going in a NE direction and disappearing over the horizon behind mountains. Gave the appearance of tumbling.		11. COMMENTS Sighting was 5 min. Report came from 13 sources consolidated in one report. Unable to determine if the time was this duration or covered the limits of reported sightings. Also colors from opposing ends of the spectrum, and unable to determine if all these colors were reported by all witnesses or if this was a composite. Or whether all reported tumbling. If the duration was that of a meteor, this sighting would be identified as such. Also an aurora was known to be in area. Insufficient data for evaluation.
